From: Trevor Woerner <twoerner@gmail.com>

The 'ns' cgroup is considered deprecated. Change the cgroup subsystem used in the examples of the cgroup documentation from 'ns' to 'blkio'.

To change the set of subsystems bound to a mounted hierarchy, just remount with different options:
-# mount -o remount,cpuset,ns hier1 /dev/cgroup
+# mount -o remount,cpuset,blkio hier1 /dev/cgroup

-Now memory is removed from the hierarchy and ns is added.
+Now memory is removed from the hierarchy and blkio is added.

-Note this will add ns to the hierarchy but won't remove memory or cpuset, because the new options are appended to the old ones:
-# mount -o remount,ns /dev/cgroup
+# mount -o remount,blkio /dev/cgroup

To Specify a hierarchy's release_agent:
# mount -t cgroup -o cpuset,release_agent="/sbin/cpuset_release_agent" \
