Hi,

I am happy to annouce the availability of EasyVZ, an OpenVZ management GUI under the GPL. EasyVZ makes it simple to create,destroy and manage Virtual Private Servers from within a cozy and comfortable graphical user interface. The EasyVZ client can manage the server from anywhere over the network, although, currently there is no authentication available.

EasyVZ is currently alpha quality software and is being released in the spirit of "releasing early", mainly to receive user feedback.

Please visit the EasyVZ project SourceForge.net page at:
http://sourceforge.net/projects/easyvz

You can view screenshots here:
http://easyvz.sourceforge.net

Thanks & Regards,
Shuveb Hussain
