I first installed yaird deb package using dpkg command.

When installing yaird, there is a error message showed conflict with lvm2, lvm-common packages.

I removed these two lvm-related packages and got yaird installed.

Then I downloaded debian image from

[http://download.openvz.org/kernel/debian/etch/linux-headers-2.6.18-openvz-sparc64-smp\\_028test007.1d1-1\\_sparc.deb](http://download.openvz.org/kernel/debian/etch/linux-headers-2.6.18-openvz-sparc64-smp_028test007.1d1-1_sparc.deb) and

[http://download.openvz.org/kernel/debian/etch/linux-image-2.6.18-openvz-sparc64-smp\\_028test007.1d1-1\\_sparc.deb](http://download.openvz.org/kernel/debian/etch/linux-image-2.6.18-openvz-sparc64-smp_028test007.1d1-1_sparc.deb) .

when using dpkg to install this kernel image. this is the part of the error message popped up.

Thanks.

Sam
