Vasily Tarasov wrote on Mon, 12 February 2007 15:09: is firewall off?

do you use SELinux or alike?

On what stage OpenVZ system does not see back packets?

I mean, for example, does tcpdump show incoming packets?

No firewall or any other security system enabled.

I've checked with tcpdump originaly, amd it does not see the incoming packets, while other LAN hosts see the outgoing packets

from the openvz system and send back replies.

Thanks
