Kir.

Thanks for responding, but whatever I try fails.
vzyum 202 groupinstall 'Development\ Tools'
vzyum 202 groupinstall Development\ Tools
vzyum 202 groupinstall "Development\ Tools"
vzyum 202 'groupinstall Development Tools'
vzyum 202 "groupinstall Development\ Tools"
+ various other attemtps

All produce the same result.

exec /usr/share/vzyum/bin/yum -c /vz/template/centos/4/i386/config/yum.conf --installroot /vz/root/202 --vps=202 groupinstall Development Tools
