Subject: *SOLVED* Can't stop the VE

I run a VE which try to use an NFS mount. It looks like the NFS mount was lost. I tried to restart the VE first without the --fast option but the results are the same.

titan ~ # vzctl stop 108 --fast
Stopping VE ...
Unable to stop VE: operation timed out

There is a process in D state inside the VE:

```
6376 ?        Ss     0:07 init [3]
8501 ?        D      0:00  \_ /usr/sbin/exim -Mc 1HVmqs-0002Ta-5A
8985 ?        Ds     0:00  \_ shutdown -h 0 w
```

Is there anything I can do it? The machine is far away from me.
Thanks for any ideas.
