The following wiki page should be updated:

http://wiki.openvz.org/Installation_on_Debian

because the link to the config file is no longer valid. Instead of

"Or get a 2.6.18 kernel config from http://download.openvz.org/kernel/devel/current/configs/

wget http://download.openvz.org/kernel/devel/current/configs/kern
el-2.6.18-028test010-i686.config.ovz -O .config"

it should be:

"Or get a 2.6.18 kernel config from http://download.openvz.org/kernel/branches/2.6.18/current/co
nfigs/"

and the absolute link to the config file should also be updated.
