Subject: NFS with RHEL5 kernel?

I have NFS mounts inside the VE working fine with
kernel-smp-2.6.18-ovz028stab027.1.i686.rpm.

I tried the ovzkernel-2.6.18-8.el5.028stab027.1.i686.rpm
kernel, but NFS doesn't seem to work.

Is NFS supported in the openvz RHEL5 kernels? The changlog mentions NFS
a couple places, but maybe that's not NFS mounts within the VE?

The NFS page in the wiki seems out of date with the new kernels.

Thank you,
