I want to install yum in a VE from the HN and issue this command:

vzyum 134 install yum

vzyum checks dependencies and ends this way:

Transaction Summary
 ==
================
Install   83 Package(s)
Update   0 Package(s)
Remove   0 Package(s)
Total download size: 67 M
Is this ok [y/N]: y
Downloading Packages:
warning: rpmts_HdrFromFdno: V3 DSA signature: NOKEY, key ID 443e1821

Public key for coreutils-5.2.1-31.4.i386.rpm is not installed

The public key for centos4-base is installed in HN and VE. So WTF?

BTW: this is not a new HN. There are several VEs which were updated for a year now.

HN is CentOS 4-4.2, VE is centos-4-i386-default
