Hey, guys.
Here's the tech's concern:

> Here is the link that describes a work around for the openvz problem. Note
> that fedora core 6 64bit has not been tested. The first paragraph titled
> "THE PROBLEM" described what I said:
>
> http://wiki.openvz.org/Install_OpenVZ_on_a_x86_64_system_Cen tos-Fedora

Any comments?
