---

to make life easier, I put this into /usr/local/sbin/vzdrop:

```
#!/bin/bash
iptables -A FORWARD -i eth0 -s $1 -j DROP
iptables -A FORWARD -i eth1 -s $1 -j DROP
iptables -A INPUT -i eth0 -s $1 -j DROP
iptables -A INPUT -i eth1 -s $1 -j DROP
```

```
chmod +x /usr/local/sbin/vzdrop
```

Then to drop an IP:

```
vzdrop 65.252.39.146
```

And you've blocked the attacker.
