Subject: [PATCH] mutex_unlock() later in seq_lseek()
Posted by Alexey Dobriyan on Tue, 29 May 2007 12:38:10 GMT
View Forum Message <> Reply to Message

All manipulations with struct seq_file::version are done under
struct seq_file::lock except one introduced in commit
d6b7a781c51c91dd054e5c437885205592faac21
aka "[PATCH] Speed up /proc/pid/maps"
