Thanks for the help! Yes, I catch some ICMP info on HN, when run "ping 217.20.116.1" at VE110 .  
And I'm sure net.ipv4.ip\_forward="1"

```
// TCPDUMP ICMP ON HN
```

```
16:28:37.828222 IP (tos 0x0, ttl 64, id 0, offset 0, flags [DF], proto 1, length: 84) 89.149.221.89 > 217.20.116.1: icmp 64: echo request seq 256
```

```
//sysctl -a
```

```
net.ipv4.ip_nonlocal_bind = 0  
net.ipv4.ip_no_pmtu_disc = 0  
net.ipv4.ip_autoconfig = 0  
net.ipv4.ip_default_ttl = 64  
net.ipv4.ip_forward = 1  
net.ipv4.tcp_retrans_collapse = 1  
net.ipv4.tcp_sack = 1  
net.ipv4.tcp_window_scaling = 1  
net.ipv4.tcp_timestamps = 1
```

```
//
```
