I would like to use multiple VEs with multiple IP addresses. However these addresses are on multiple network, semething like this:

HM: 195.1.1.1
VE101: 195.1.1.2
VE102: 193.2.2.1

The first two (HM+VE101) works fine, but I could not manage the VE102 to start working.

Any idea?
