Subject: *SOLVED* vzctl restart from crontab

Im trying to restart a VE from crontab. But I get "operation timed out" everytime.

*/2 * * * * /usr/sbin/vzctl restart 666 >>/tmp/log 2>&1

cat /tmp/log

Restarting VE
Stopping VE ...
Unable to stop VE: operation timed out

I have tried "vzctl stop" with the same results. But "vzctl start" works.
If I run it from normal shell it works.

Any ideas?
