Yup, Vanilla 2.6.18 patched with patch-ovz028stab035.1-combined.gz, using kernel-2.6.18-x86_64-smp.config.ovz as .config, with a few changes to suit my devices.

As I said, base instance has pts's - Host os is Gentoo 2006.1, template is gentoo-20060317-amd64-stage3.tar.gz.

Best Regards, Paul.
