in debian.

-> apt-get install xserver-xorg-core xfonts-base xfonts-100dpi xfonts-75dpi

but you must install udev before to do this.

Wiki -> http://wiki.openvz.org/Installing_udev_in_VE_based_on_Debian -4.0

vzctl set XXX --features "sysfs:on" --save.

This tip could work, but i cant install nxserver with this

"sorry for my english"
