I believe it is glibc-common package:

cat /etc/redhat-release
CentOS release 4.2 (Final)
rpm -qal | grep en_US | grep LC_CTYPE
/usr/lib/locale/en_US.iso885915/LC_CTYPE
/usr/lib/locale/en_US.utf8/LC_CTYPE
/usr/lib/locale/en_US/LC_CTYPE
rpm -qf /usr/lib/locale/en_US/LC_CTYPE
glibc-common-2.3.4-2.13
