
Subject: [RFC][PATCH] Isolate some explicit usage of task->tgid
Posted by [Pavel Emelianov](#) on Fri, 17 Aug 2007 12:39:13 GMT
[View Forum Message](#) <> [Reply to Message](#)

With pid namespaces this field is now dangerous to use explicitly, so try to hide it behind helpers. This is not a complete list of users, but just the core.

Signed-off-by: Pavel Emelyanov <xemul@openvz.org>

plans:

the pid, tgid and pgrp fields of task_struct and signal_struct are to be marked as deprecated. Unfortunately this patch cannot be sent right now as this leads to tons of warnings, so start isolating them, and deprecate later to make other maintainers switch to using namespace-safe routines.
