we concur with how reboot works

i discover problem is VZ creates the vz contab with file permissions 644

```
#chmod 755 /etc/cron.d/vz
```

problem solved

good news is: i have already 2 x customers who have purchased VPS on my new host system

... bad news is: i now have 2 x "is there a control panel? how do i work linux?"

how am i going to manage 40 n00bs? support contracts!
