hey,

Are you sure that IRC thing will work?

Because the ips added by loopbacks such as

```
lo:256  Link encap:Local Loopback  
        inet addr:xx.xx.xxx.xxx  Mask:255.255.255.255  
        UP LOOPBACK RUNNING  MTU:16436  Metric:1
```

So I have to remove them before it can be useful for VPSes.

A.
