Hello,
I'm getting this:
....
LD [M] lib/zlib_deflate/zlib_deflate.o
Building modules, stage 2.
MODPOST

make: *** [debian/stamp-build-kernel] Error 2

when I try to build openvz-enabled kernel. I'm using 2.6.18 /pristine/
(it looks like ovz028stab039.1 already includes 2.6.18->2.6.18.8 patches,
and one needs to dig out older 2.6.18 to make this patch apply).

is this normal?
