Subject: [PATCH 6/12] L2 network namespace: socket hashes
Posted by Mishin Dmitry on Wed, 06 Dec 2006 22:27:25 GMT
View Forum Message <> Reply to Message

Socket hash lookups are made within namespace. Hash tables are common for all
namespaces, with additional permutation of indexes. Asynchronous events
should be run in proper namespace.

Signed-off-by: Dmitry Mishin <dim@openvz.org>
