Subject: Grr sysfs networking changes...

I've almost got my netns patchset rebased against linus's latest tree.
The sysfs changes were extensive and while I finally have something working with them. Every time I stop and think about my sysfs code I spot more issues that need to be resolved.

With any luck I should have something I can live with soon and I can finish getting an updated version of my network namespace patchset out...

Eric
