Subject: Disk quota on gentoo template

Hello,

I've got a problem with my gentoo-vps.

I'm using the same configuration file for a gentoo and a debian vps.
I've a limit on disk space set to about 5GB. On debian-vps this limit works and I can use all of the 5Gb.
On Gentoo-vps I can only use about 1,2Gb.

Does anybody got an idea, where the problem is?

TIA,
Steffen
