It is not complex

```
#!/bin/sh
```

```
vzprivate="/run/vz/private"
```

```
backupdir="/run/backup"
```

```
for x in `ls $vzprivate` ; do
```

```
    cd $vzprivate/$x; tar -czf $backupdir/vps.$x.`date +%a`.tgz .
```

```
done
```

And you could start it by cron so often, how much it is necessary for you. Also you could use nice for downturn of a priority of it.
