```

This patch was intended as a fix for the current behaviour, and a preparation for the pid_ns requirements. If possible, it should go ahead of all other pid_ns changes, imho.

In any case, we shouldn't mix all this in one patch.

If there are no objections to this approach, I'll re-send the patch on weekend.

```

This is not needed. Please look at

<http://marc.info/?l=linux-kernel&m=118763989718143>

I specially removed this chunk in a separate patch, no need to re-introduce.

Oleg.
