Hi,

What is the difference between /vz/private/ and /vz/root/ ?
I see that /vz/private/101 and /vz/root/101 are hard linked.
So now i want to move /vz/private/101 to dedicated filesystem
how should i handle /vz/root/101?
Can i just symlink /vz/root/101 to /vz/private/101?

Thanks
Alex
