Please do what you think right, and please use/drop this patch as you wish.

I am really sorry, I am very busy with my paid job, and it is very far from  
the kernel hacking. I don't have the time/energy to follow :(

Besides, I've already lost the track on what's going on in this area...  
Perhaps I will be able to return in a couple of weeks, but can't promise  
anything.

Good luck ;)

Oleg.
