Sorry, yes the VPS was stopped at the time of doing the route -n on the host.

```
# route -n
Kernel IP routing table
Destination     Gateway         Genmask         Flags Metric Ref    Use Iface
72.55.180.210   0.0.0.0         255.255.255.255 UH    0      0        0 venet0
72.55.180.209   0.0.0.0         255.255.255.255 UH    0      0        0 venet0
72.55.180.208   0.0.0.0         255.255.255.248 U     0      0        0 eth0
72.55.179.0     0.0.0.0         255.255.255.224 U     0      0        0 eth0
169.254.0.0     0.0.0.0         255.255.0.0     U     0      0        0 eth0
0.0.0.0         72.55.179.1     0.0.0.0         UG    0      0        0 eth0
```

I have now setup 2 VPS, IP 209 and 210. both refuse to communicate with the host or the web. and the host refuses to communicate with the VPS.

I am using the up to date vzctl and vzquota packages v3.0.18. and i do have iproute installed on the host, I also have enabled ip_forward.

When i start the VPS the records are added to the route. And when i stop the VPS, the records are removed.
