Hi,

1. Quote:[root@VE101 /]# ping google.com
ping: unknown host google.com

May be you have not set a nameserver for your VPS. To do it, please see "man vzctl", namely "nameserver" parameter.

2. Are you sure, that IP address 72.55.180.209 is valid to access the Internet. Have you come to an agreement with your provider about this IP?
