Subject: Support for autofs in RHEL5-based VPS

Hello OpenVZ developers,

Does anyone have any ideas of why autofs doesn't work in the current OpenVZ patches on a RHEL 2.6.18 kernel? I noticed that there were some autofs patches posted to this back in February 2007 but I don't know if they specifically solve this issue. I have an on-going forum thread here which details the issues, there seems to be a workaround using a vanilla 2.6.18 kernel and AMD, etc.

http://forum.openvz.org/index.php?t=msg&goto=21652&#msg_21652

Thoughts?
