I found an option to set mac manually with ifconfig

likeifconfig br0 hw ether 00:14:22:75:86:7e

i can add this command to the EXTERNAL_SCRIPT run by /etc/vz/vznet.conf then VE starts up, but there is no

such script then VE is shut down, is there any place

i can put the ifconfig br0 hw ether 00:14:22:75:86:7e

command then any of the VE is shuts down?

Thanks
