Hello,

you need to kernel for vps customer or original server?

for original server is :

```
[root@localhost ~]# uname -a
Linux localhost.localdomain 2.6.9-023stab040.1-smp #1 SMP Tue Jan 16 00:54:22 MSK 2007
i686 i686 i386 GNU/Linux
[root@localhost ~]#
```

for vps customer is :

```
[root@server1 /]# uname -a
Linux server1.domain.com 2.6.9-023stab040.1-smp #1 SMP Tue Jan 16 00:54:22 MSK 2007 i686
i686 i386 GNU/Linux
```
