Hi,

1. You have forgotten to show the output of "lsof | grep delete" at THAT moment (after 3 days of work without reboot). Please attach the output of "lsof" command at THAT time too.
2. Also can you show the output of "uname -a" and version vzctl you use?
3. Try to do following:
  - a)stop VE
  - b)vzquota drop <veid>
  - c) vzctl start <veid>

Thank You!
