Hi maratrus, this is my lsof output (extrange but real :S)

```
root@anuncios:/# lsof |grep delete
root@anuncios:/#
```

If I just do lsof it show a lot of files but If I do a grep delete it don't show nothing.

this is my uname -a output:

```
root@anuncios:/# uname -a
Linux anuncios.jornada.com.mx 2.6.18+openvz #1 SMP Thu Aug 9 14:38:45 CDT 2007 x86_64
GNU/Linux
root@anuncios:/#
```

My version of vzctl its 3.0.11-13 server virtualization solution - control tools

I tried the vzquota drop 104 but it do this:

```
root@gribus:~# vzctl stop 104
Stopping VPS ...
VPS was stopped
VPS is not mounted
root@gribus:~# vzquota drop 104
vzquota : (warning) Quota is running for id 104
root@gribus:~# vzctl start 104
Starting VPS ...
vzquota : (warning) Quota is running for id 104 already
VPS is mounted
Adding IP address(es): 132.248.10.53
Setting CPU limit: 10
Setting CPU units: 1000
Set hostname: anuncios.jornada.com.mx
File resolv.conf was modified
Setting quota ugidlimit: 100
VPS start in progress...
root@gribus:~#
```

any way if you want it I wait 3 days to do the lsof and paste it here. Really man, tnks for your time and wish of help to others.
