I read this thread now

http://sourceforge.net/mailarchive/forum.php?thread_name=46893903.2010901%40nerim.net&forum_name=munin-users

, and did this:

munin-run

Warning: Unknown config option in "/etc/munin/plugin-conf.d/munin-node" under "[vebc*]":
env.config at /usr/sbin/munin-run line 619, <IN> line 19.

[...]

Use of uninitialized value in concatenation (.) or string at /usr/sbin/munin-run line 321.

ERROR: Could not execute plugin (plugin doesn't exist?).

less -N `which munin-run`

[...]

619 warn "Warning: Unknown config option in \"\${dir}/\${file}\" under \"[\${service}]\": \$_";[...]

I commented that line in /etc/munin/plugin-conf.d/munin-node out:

env.config

but I still get:

[...]

Use of uninitialized value in concatenation (.) or string at /usr/sbin/munin-run line 321.

ERROR: Could not execute plugin (plugin doesn't exist?).

less -N `which munin-run`

[...]

321 next unless (\$file =~ /^\$ARGV[0]\$/);

I also tried to debug with telnet:

telnet localhost 4949

Trying 127.0.0.1...

Connected to pv10.ncsrv.de.

Escape character is '^['.

munin node at pv10.ncsrv.de

fetch vebc_numfile_privvmpages_lockedpages_001

.

config vebc_numfile_privvmpages_lockedpages_001

Unknown service

.

Connection closed by foreign host.

Hmmm... it's an unknown service, why?

\$ /usr/share/munin/munin-update --debug --nofork --stdout --host foo.example.com --service
vebc_numfile_privvmpages_lockedpages_001

Nov 03 17:38:43 - [22244] Starting munin-update

Nov 03 17:38:43 - [22244] Processing domain: localdomain

Skipping host "localhost.localdomain" - not in hostlist
Nov 03 17:38:43 - [22244] Processed domain: localdomain (0.00 sec)
Nov 03 17:38:43 - [22244] Munin-update finished (0.09 sec)

```
$ /usr/sbin/munin-run vebc_numfile_privvmpages_lockedpages_001 config
Warning: Unknown config option in "/etc/munin/plugin-conf.d/munin-node" under
"[apache_accesses]": env.autoconf at /usr/sbin/munin-run line 619, <IN> line 12.
graph_title beancounter for VE001: numfile privvmpages lockedpages
graph_category VE001
graph_info 'VE bean counters info'
```

<http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=416478>

Any clues?
