I installed last OpenVZ kerlnel for SUSE10 (kernel-smp-2.6.16_ve026test007.1-10) and got a error during loading: sh: can't access tty: job control turned off.
Is it a bug??

```
virt:~ # cat /etc/lilo.conf
timeout = 30
prompt
default = SUSE_LINUX_9.2
lba32
boot = /dev/md0
raid-extra-boot="/dev/sda,/dev/sdb"
image = /boot/vmlinuz
    label = SUSE_LINUX_9.2
    initrd = /boot/initrd
    optional
    root = /dev/md0
```
