Hi,

I have follow problem after updating my host and vps system.

Steps, that i have did:

1. Update OpenVz-Kernel and OpenVz-Tools with yum, kernel version is now 2.6.18-53.el5.028stab051.1

2. Update my VPS (based on fedora core 5 template) with vzyum 100 update

after that i can not start my updated vps (another two unupdated vps working fine), the fault message is:

```
[root@server ~]# vzctl start 100
Starting VE ...
Running: /usr/sbin/vzquota stat 100 -f
VE is unmounted
Mounting root: /vz/root/100 /vz/private/100
VE is mounted
Set iptables mask 0x000017bf
Set features mask 0000000000000000/0000000000000000
Adding IP address(es): 192.168.178.11
Running: /usr/lib/vzctl/scripts/vps-net_add
Running VE script: /etc/vz/dists/scripts/redhat-add_ip.sh
 ERROR: Can't copy file /etc/sysconfig/network
bash: line 360: 18001 Bus error           mkdir -p ${IFCFG_DIR}
bash: line 61: 18005 Bus error            ${CP} ${file} ${file}.$$
Setting CPU units: 1000
Configure meminfo: 22528
Set hostname: file.server
Running VE script: /etc/vz/dists/scripts/redhat-set_hostname.sh
 ERROR: Can't copy file /etc/sysconfig/network
bash: line 61: 18010 Bus error            ${CP} ${file} ${file}.$$
VE start in progress...
```

and vzctl.log says:

2007-12-12T13:25:11+0100 vzctl : VE 100 : Starting VE ...
2007-12-12T13:25:11+0100 vzctl : VE 100 : Running: /usr/sbin/vzquota stat 100 -f

/etc/vz/dists/scripts/redhat-set_hostname.sh
2007-12-12T13:25:12+0100 vzctl : VE 100 : VE start in progress...

attend to my words at the top, another, unupdated vps with same openvz-template working fine.

the solution described here:

http://forum.openvz.org/index.php?t=tree&th=405&mid= 2355&&rev=&reveal=

does not.

thanks for answering!

Nikolai
