Subject: Live CD ISO images for Download not found

Hello,

The Live CD of Knoppix (5.1.1) or CentOS (4.4) seems to be a good idea to test out OpenVZ as well. I found the download page on this site:

http://wiki.openvz.org/Download_live_CD

But, when I tried to download either the CentOS or Knoppix ISO image, the file cannot be found. Any ideas? Could someone check to see if the server is down?

Thanks!
