I tried to use the 075 kernel but when I try modprobe highpoint raid card driver I get incompatible version error(the module compilation process works fine, I don't get error messages). I had the same

problem on 072 kernel, the solution is to build kernel from sources. For now I will wait for official release of 075 kernel.

Can you add HighPoint open source drivers to the kernel?

<http://www.highpoint-tech.com/BIOS%20+%20Driver/rr2224/Linux/rr222x-linux-src-1.03-060328-1734.tar.gz>

Thanks for your help.
