kir wrote on Wed, 21 December 2005 08:04Just create a new partition, mount it to, say, /vz.new and then copy all data from /vz to /vz.new using cp -a.

Then, umount /vz.new, remove everything from /vz and mount new partition to /vz.

Hi there, if right now

Quote:

Filesystem	Size	Used	Avail	Use%	Mounted on
/dev/sda2	221G	28G	183G	13%	/
/dev/sda1	965M	42M	874M	5%	/boot
tmpfs	1013M	0	1013M	0%	/dev/shm

This is what I have, how can I create a partition from an existing mounted partition?
