Hi,

1. Can you provide us with strace output of mount command?

strace -f -o <OUTFILE> <MOUNT_COMMAND>

2. Please attach also dmesg output.

3. Have you any other failcnt in /proc/user_beancounters? Can you show /proc/user_beancounters? Are failcnts clear after VPS was stopped and started again? If it is possible please show /proc/user_beancounters after VPS was stopped and after VPS was started.

Thank You!
