maratrus wrote on Mon, 11 February 2008 13:55Sure, if PRIVVMPAGES="262144:292912" that values are expected.
Please, look at http://wiki.openvz.org/UBC_parameters

Oh.. I see, it's pages not bytes xP
Although I've configured my VPS based the third example from the UBC, here: http://wiki.openvz.org/UBC_configuration_examples_table

And it says the server will have 250mb of user memory with that privvmpages on set, is there any reason about it?
