Hi Satish,

I noticed a clue at
http://forum.openvz.org/index.php?t=msg&goto=25544&&srch=%22no+route+to+host%22#msg_25544

After flushing the iptables with the -F flag, I was able to properly connect to all machines and nslookup addresses, whereas like you I was only able to ping some addresses and only by IP instead of name before.

I think when I setup the HN I replied "yes" to installing the firewall.

Regards,
Ken Booth
