Um problem remains:
I set:
vzctl set 104 --devnodes mem:rw --save
And restarted VE, then i checked dev nodes in VE:
Doktor:/# ls -l /dev/mem
crwxrwxrwx 1 root news 1, 1 Apr 24 2007 /dev/mem

But when i try to install still get same problem:
apt-get --reinstall install xfonts-base
