Hi,
 this issue:

sysfs: duplicate filename ':0000288' can not be created

kobject_add failed for :0000288 with -EEXIST, don't try to register things with the same name in the same directory.

which has been introduced around the time when checkpointing returned to
2.6.24, still hasn't been fixed in ovz002...
(pure 2.6.24 works ok, and few git 2.6.24-pre versions worked ok, but ovz002
spills this)
