Subject: network namespace ipv6 perfs

Hi,

Some performance tests was made by Benjamin to watch out the impact of the network namespace. The good news is there is no impact when used with or without namespaces. That has been checked using a real network device inside a network namespace.

These results are consistent with the ones previously made for ipv4.

http://lxc.sourceforge.net/network/bench_ipv6_graph.php

Thanks to Benjamin who did all the performance tests :)

Regards
-- Daniel
