Is it possible to enable user quotas inside VE?

I have a openvz installed on debian server.

My /etc/fstab;

```
# /etc/fstab: static file system information.
#
# <file system> <mount point>   <type>  <options>       <dump>  <pass>
proc            /proc           proc    defaults        0       0
/dev/sda1       /               ext3    defaults,errors=remount-ro 0       1
/dev/sda2       none            swap    sw              0       0
/dev/hda        /media/cdrom0   udf,iso9660 user,noauto     0       0
/dev/sda5       /var/lib/vz/private/100 ext3    defaults,errors=remount-ro      0       1
```
