I guess I am just having a different issue....

I am trying to install CSF on a VE running cpanel, and I am getting:

iptables: Unknown error 4294967295

LOG tcp opt -- in \* out \* 0.0.0.0/0 -> 0.0.0.0/0 limit: avg 30/min burst 5 LOG flags 0 level 4 prefix

`Firewall: \*TCP\_IN Blocked\* '

Error: iptables command [/sbin/iptables -v -A LOGDROPIN -p tcp -m limit --limit 30/m --limit-burst 5 -j LOG --log-prefix 'Firewall: \*TCP\_IN Blocked\* '] failed, at line 204

any suggestions?
